

**BURG®**

**FLEXO**

# FLEXO

## RetroFit

RetroFit installation makes it easy to replace existing locks with 16 mm x 19 mm mounting holes. Retrofitting is quick and cost-effective.

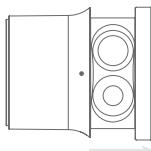

## FlushFit

The Flexo is recessed in the furniture front and screwed in place with the Flexo.Ring. The lock stands out only minimally from the front with its discreet appearance.

## Flexibility

The Flexo can be used with all BURG steel cams. Installation does not differ from purely mechanical solutions.

## Battery drawer

The batteries can be changed from the outside in both installation situations without having to unlock or dismantle the lock.

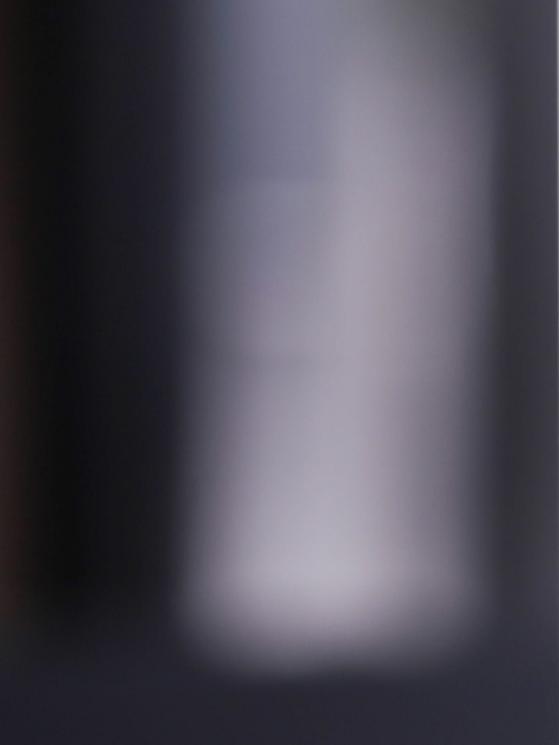

# Flexo.Cloud

The cloud products are innovative locking system solutions with outstanding cloud functionality, enabling convenient operation via card or app (iOS and Android). Operation via app, which also serves as a gateway, is particularly popular - a separate gateway is therefore not required. Specially requested functions can be adapted or newly integrated in the software.

Flexo.Cloud FlushFit

Flexo.RFID FlushFit

# Flexo.RFID

The Flexo.RFID (Radio Frequency Identification) was developed for the leading standards (MIFARE® Classic and MIFARE® DESFire® EV). Most existing RFID medias can be used with deactivated occupancy identification, as these are then only read, not written. Up to 10 user cards can be stored in private mode.

# Flexo.Light

This lock offers an entry-level solution for the digital locking of lockers and safe deposit boxes. The two authorization levels (master and user) offer simple and uncomplicated configuration. Furthermore, it runs on the leading RFID standards (MIFARE® Classic and MIFARE® DESFire® EV).

Flexo.Code RetroFit

# Flexo.Code

The Flexo.code impresses with its intuitive operation and ergonomic rotary knob. rotary knob. The user can choose from 999,999 code options. The innovative design lock - Made in Germany - enables the secure storage of personal belongings, for example in offices, schools as well as sports and wellness facilities.
