

INTRO

The entry into a new dimension of digital security for steel and wooden furniture.

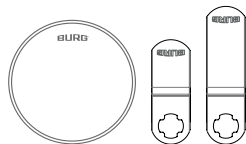

Value

The Intro impresses with its selection of high-quality materials. Especially the solid metal knob convinces with its galvanic surface.

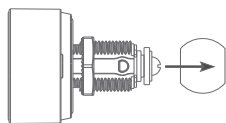

External battery change

The batteries can be changed from the outside, without unlocking. This ensures greater flexibility when it comes to maintaining the locking system.

100% compatibility

With the Intro, all BURG steel cams can be used. Installation and assembly do not differ from classic mechanical solutions.

Retrofit-Ready

Like almost all cabinet locks, the Intro uses a 16 mm x 19 mm mounting hole. Retrofitting is simple: mechanics out - electronics in.

Intro.Code

The Intro.Code is simple and self-explanatory. The lock can be unlocked and locked by a simple code entry. To enhance security, the lock has a fake code function that protects against unauthorized reading of the code during the locking process.

A new dimension

The Intro is the entry-level solution for convenient electronic locking of lockers and safe deposit boxes. It is simple and can be operated intuitively using either a code or RFID transponder. The range of functions has been deliberately designed without any frills - it is simple and uncomplicated.

Intro.RFID

With the Intro.RFID, personal items can be securely locked with a card, wristband or chip. It was developed for the common RFID standards (MIFARE® Classic and MIFARE® DESFire® EV). The transponder media are only read, not written to. Up to 6 user cards can be assigned in private mode.
