

NOVA

The NOVA - the smart premium solution
for exclusive wood and steel furniture

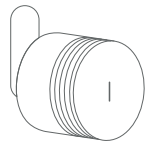

External battery change

The batteries can be changed from the outside without tools and without having to unscrew or unlock the lock.

Flexibility

The NOVA can be used with the common BURG cams. The assembly does not differ from purely mechanical solutions.

Retro-Fit

Designed for wood and steel furniture, the NOVA is easy to install thanks to 16 mm x 19 mm mounting holes.

NOVA

Elegant appearance combined with innovative technology.

With the electronic designer lock NOVA, high-quality furniture is not only visually upgraded, but also becomes a smart office solution that simplifies everyday life

Developed in cooperation with USM, the NOVA complements the „Lock C“, which can be retrofitted to all USM Haller furniture.

Proven RFID technology, supplemented by operation via smartphone app, makes the NOVA the perfect security solution in all smart offices. The modern management system enables seamless processes and simplifies everyday life in the flex office with shared desk solutions.

Simple operation via USM app

The NOVA can be operated uncomplicated and simply with secure end-to-end encryption (Bluetooth®) via the USM app.

Cloud connection

Thanks to the cloud connection via the app, the NOVA can be easily configured and managed. Time and costs for administration are reduced.

Flexible user mode

The lock has four basic modes, which can be configured via the app: Private (with app), Shared (with app), Personal (with RFID) and Multi-user (with RFID).

Transponder forms

Many existing RFID media such as cards, wristbands and chips can still be used thanks to LEGIC® technology. The NOVA also supports all LEGIC® and ISO 14443A compatible transponders.
